

Exploring Farming Series

Toolkit

Getting started in farming is hard no matter your background or enterprise. That's why it's important for beginning farmers to have a solid grasp of their goals and readiness. With this understanding, they can create a plan to chart their path forward. The "Explore Farming" series toolkit offers a suite of resources to help beginning farmers figure out the best path for their situation.

Each chapter includes exercises to help farmers assess their skills and resources, and provides direction for next steps in building a farm business.
